

# Secure Formulary

by Express Scripts Canada

provided by

**RWAM**

**EXPRESS SCRIPTS®**

Attracting and retaining top talent in any industry means offering employees a comprehensive benefit package that protects them and their family members. **With the ever-rising cost of prescription drugs, maintaining affordable benefit packages has become a challenge.**

RWAM Insurance Administrators Inc. has partnered with Express Scripts Canada (ESC) to bring you **SECURE FORMULARY\***.

## ESC Secure Formulary

This program allows employers to offer comprehensive coverage for commonly prescribed drugs, while excluding high-cost specialty drugs that are driving claim trends to a level that is not sustainable.

High-cost specialty drugs that are excluded may have **alternative coverage** through provincial or pharmaceutical manufacturer programs. RWAM has partnered with ESC to help guide plan members through that process.

## Guiding plan members prescribed high-cost, specialty drugs

When a Plan Member is prescribed a specialty drug, their physician will typically connect them with the patient support program (PSP) offered through the drug manufacturer. Direct affected plan members to call or email RWAM's Member Call Centre. RWAM can then initiate the reimbursement navigation support provided through ESC, to complete all necessary documentation and details required to progress through the drug funding process.

\*ESC Secure Formulary is available in all provinces, excluding Quebec.

# How to Help

---

If a plan member is prescribed a specialty drug, their physician will typically enrol them in the Patient Support Program (PSP) offered by that drug manufacturer. The PSP contact will support and educate the plan member about required prior authorization and necessary documentation needed to secure coverage.

**In the event a plan member does not have access to a Patient Support Program, use the following suggested steps to help guide the member:**

## 1. Get the specialty drug Name & Drug Identification Number (DIN)

DIN Number can be provided by your pharmacist.

## 2. Contact RWAM

By calling or emailing RWAM's Member Call Centre, RWAM Concierge can connect affected plan members with reimbursement navigation support offered through Express Scripts Canada, to find potential alternative funding through provincial or pharmaceutical manufacturer programs.

**RWAM's Member Call Centre: 1.877.888.7926**

**Email: [csr-groupclaims@rwam.com](mailto:csr-groupclaims@rwam.com)**

## 3. Consult with Express Scripts Canada

The plan member will work directly with Express Scripts Canada to determine their alternative coverage options.

## Benefits at work for you
